Paris 2023

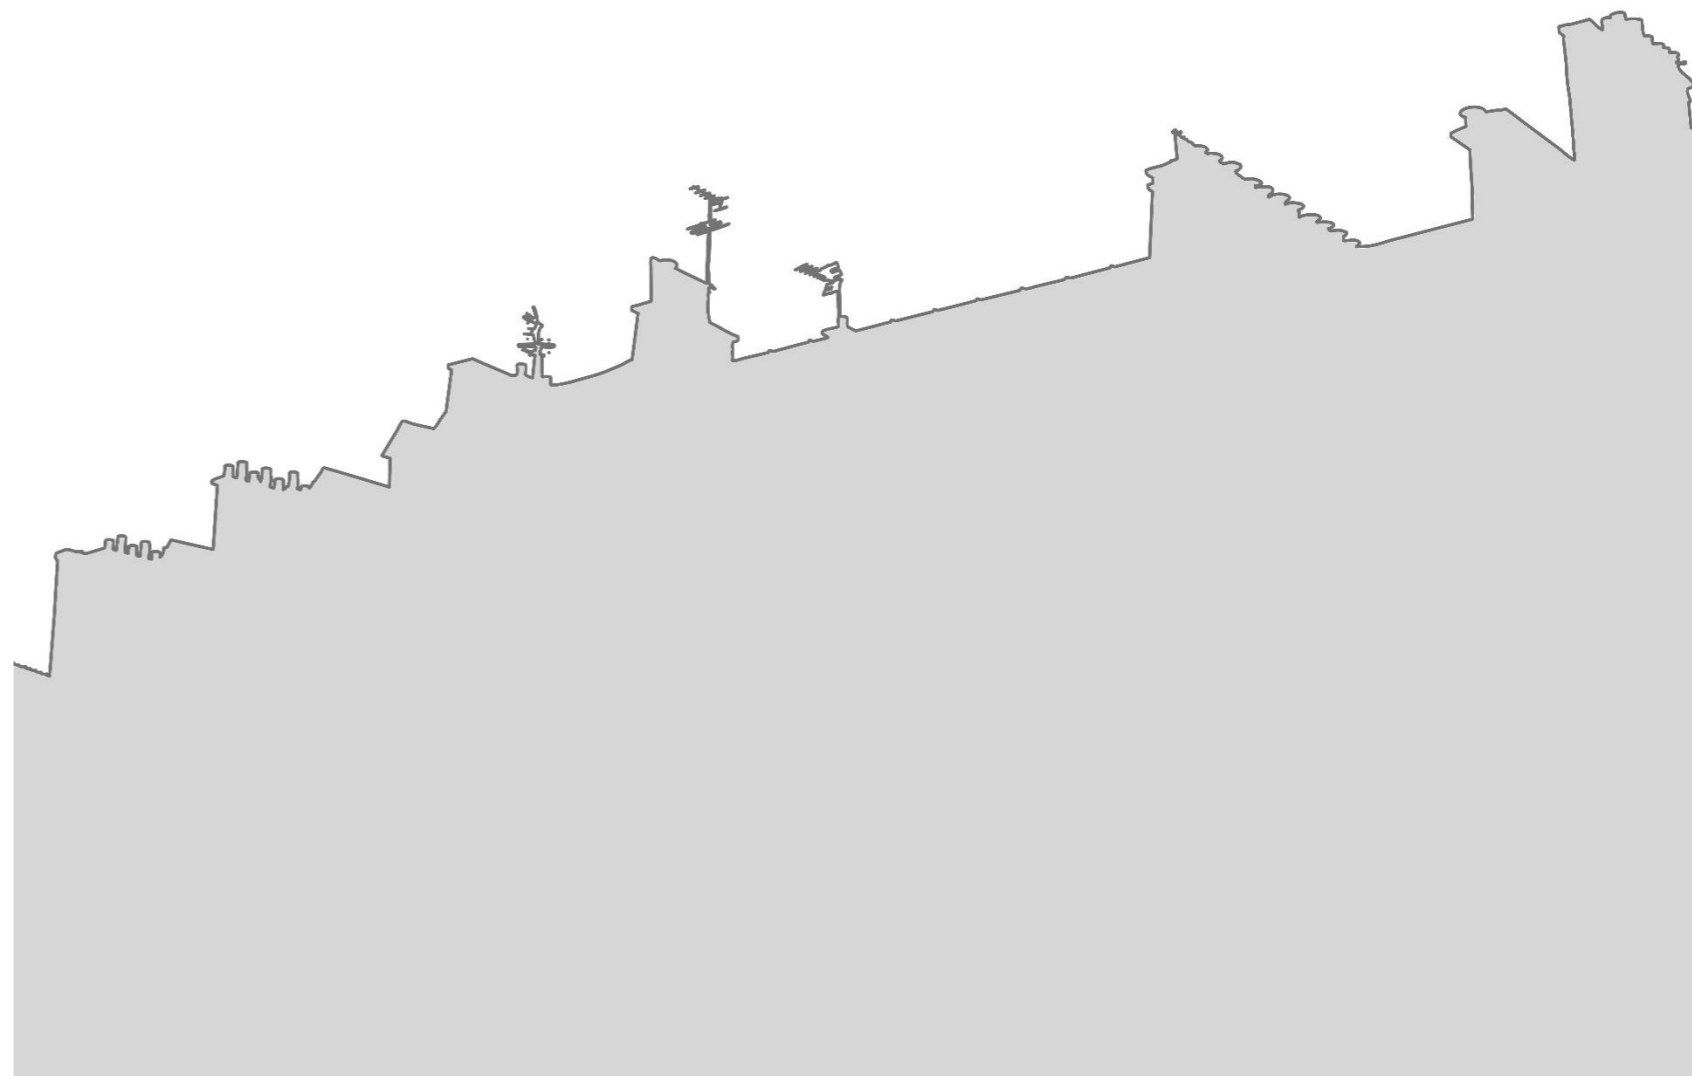

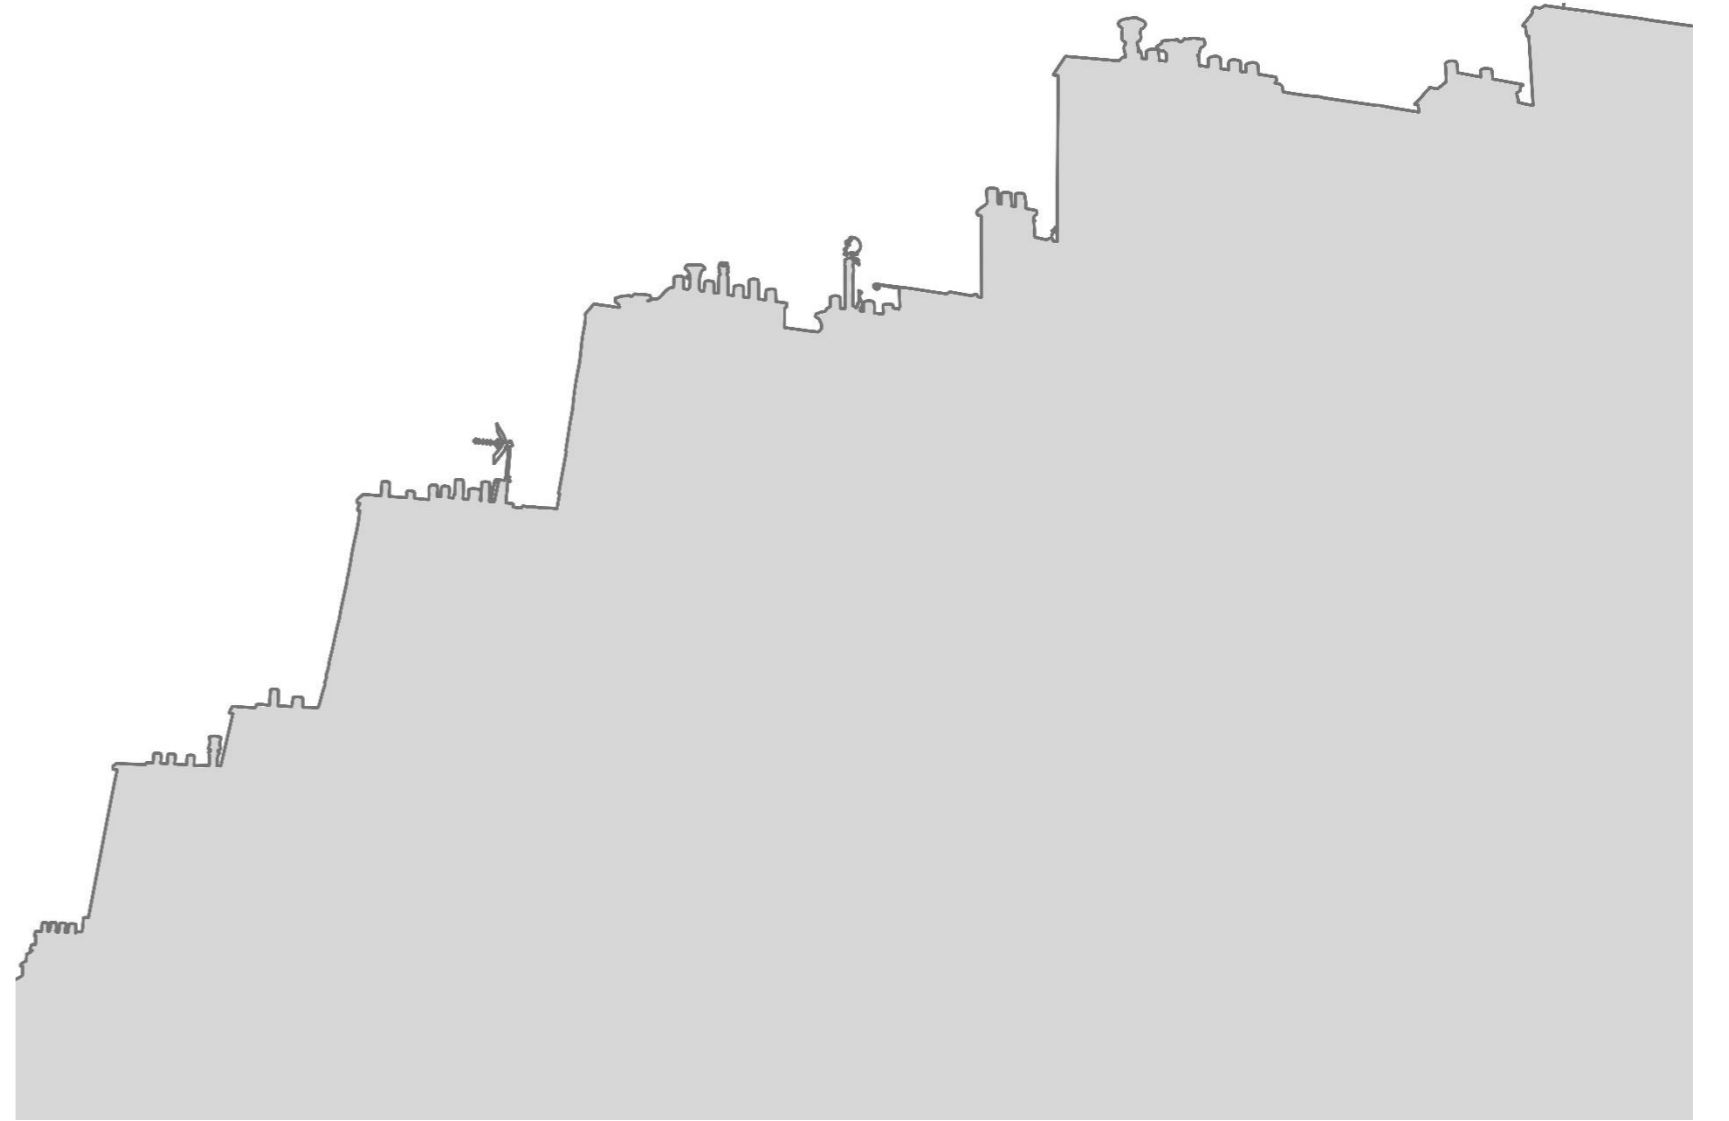

Wherever we are  
There is a secret line  
From me to you, from you to me  
Forever through all time

My home is not a planet  
My home is like a star  
My home is not a house  
My home is just your heart

All around the world  
There will never be a place  
Where we are not together  
Not in time and not in space

My home is not a planet  
My home is like a star  
My home is not a house  
My home is just your heart

All our ways are going  
On earth and in heaven above  
Along the secret path  
The invisible line called love
